

THE “FAST EARS” BOOTCAMP

I'm telling you right now... **This is an opportunity to develop one of the most important skills you will ever have as a musician!**

Here's the down low.

This January, I'm going to be working with a small group of bass players to show them **exactly how to train their ears so they can more accurately and quickly follow songs right "off-the-cuff" in real time.**

It's called **“The Fast Ears Bootcamp”** because that's exactly what we'll be doing...

...Training your ears to a point that most amateur bass players never get to... Where you can start figuring out songs without bass tabs, or someone calling out the chords for you.

This is an extremely powerful method for rapid ear training I'll be guiding you through, utilizing TWO custom-built ear-training tools we've secretly been using with our high-end coaching clients, **that automatically condition your ears to hear and accurately follow songs and chord progressions – EVEN on the fly.**

In short we'll be giving your ears a massive upgrade.

- Jay used this “Fast Ears” method + accompanying software and went from being totally lost if he didn't get told the chords, to figuring out fancy “Robert Glasper type” chord changes right in front of me LIVE...
- Gregg used the same method + accompanying software and quickly noticed that instead of desperately needing chord charts, he was figuring out songs on his own, in minutes instead of hours...
- Mike used this same method and excitedly told me he's now fully able to hear and follow progressions his keyboardist plays at church, whereas before, he would timidly turn the volume on his bass down and “hide in the background” if it was an “off the cuff” chord progression.

These are real results, they achieved this by:

1. First understanding that not all ear-training is create equal... There are most certainly more useful ways **FOR BASS PLAYERS** to train their ears, **specifically for live playing situations** and then,
2. Utilizing our practical, research-driven “ear-conditioning” software that I have personally seen “re-program students' ears” to intuitively recognize critical chord progressions - in weeks rather than years!

This is perfect if you already have some basics down, but want a practical way to build your confidence for playing in “off the cuff” situations, where you might not have a chord chart to refer to...

You and I will go over;

- **The single most practical ear training method I've personally every seen for bass players...** (*This has nothing to do with "perfect pitch", "relative pitch", "interval association", "solfege" or any of those other methods that fell short in the past*)...
- ...Exactly how we help clients ensure **their results stick over the long term** and...
- ...How to use our TWO intelligent "Fast Ears" ear-conditioning software programs to clearly hear the "language of music" **so you can follow that guitarists and keyboards in real time.**

Now I'm guessing you probably have some questions... Here are some answers.

When and where?

We're kicking off on Monday January 12th 2026. I recommend allocating about 75 to 90 minutes per week for this.

...I'll explain the method in a couple short videos, give you access to the TWO software programs and further you're also gonna have access to me in a private community, so you can ask questions along the way.

How it works:

First off, the only other people who have ever been taught this are folks in my higher end coaching programs.

So to maintain some level of exclusivity for my coaching clients, (while pricing at a fraction of the cost) I'm capping the **"Fast Ears Bootcamp"** at 7 students max.

I'm taking people **today** and I'm inviting YOU to join the crew... 7 people will get an opportunity to give themselves ears that make them look like naturally talented musicians!

Also, this isn't another "course" where you gotta find loads of time in your busy schedule and watch endless videos.

This is more about doing!

I can quickly explain everything you need to know in one sitting, then plug you into our DUAL, "artificially intelligent" ear-training software programs, (*that intelligently learn and automatically customize, based on your responses*) - then fully manages your schedule and specific ear-training tasks over the following eight (8) weeks.

Nothing is random or left to chance.

You log in daily, grab your bass and complete the tasks our software asks you to do and **watch as your ears predictably become more and more accurate, day-by-day.**

How much time do I need?

It varies, but the daily tasks can generally be completed in around 12-18 minutes per day.

Some days less, some days a tiny bit more.

It kinda depends on where your ears are "starting from", but that's still a pretty good estimate.

Do I need any previous experience playing by ear?

Absolutely not.

In fact, in my opinion, training your ears this way is one of the singular most important **first steps** for any real musical growth. So if you're kinda new, it's actually good, because you'll be starting in the right place.

Now if you've been playing for a while and you're stuck, chances are, giving your ears an upgrade is exactly what you need to do, to take that next big step.

What do I need to bring?

Not much really.

Once you have online access (*you can use your phone, iPad, laptop etc.*) some headphones and a bass you have all you need.

I mostly play gospel/rock/funk/r&b/etc, will this work for me?

Absolutely!

At the end of the day, songs of all genres are made up of "recognizable" chord progressions. Just like languages are made up of recognizable words and phrases.

People who can hear music and almost immediately start playing, can quite simply **hear this language as clearly as you can hear someone speak English** and that's what our bootcamp will be focused on. Teaching you to hear the "Language of Music"

Are there any bonuses?

Sure I'll sweeten the deal for you.

1. If you enroll on or before **Friday the 9th January**, you'll get yourself a free 1-on-1 lesson and practice planning session with me. One of the big problems a lot of self-taught bass players face daily, is not knowing where to focus their time to get unstuck.

You and I will hop on Zoom together... You'll get your bass and we'll do a

quick lesson and evaluation, and I'll plot out a personalized "next level practice plan" for you.

But this is exclusively for folks who lock in before 9th January.

2. Immediately upon enrollment everyone will get a copy of our **"Tone Shaping Secrets Workshop"**.

This was really good!

I did a private class for my coaching clients where I brought in a bassist friend of mine who's played everywhere from Red Rocks to Coachella and twisted his arm to find out exactly how he dials in knock-out bass tone for any genre, any song, every single time!

It's literally a recipe book for amazing bass tone. And it's yours free with this bootcamp.

3. There's also a big ole secret bonus when you complete the bootcamp, but I'll leave that as a nice lil' surprise for you! 😊

What's the investment?

...If you've been playing bass for more than 3 years and you are still afraid of being the weak link in a spontaneous playing situation...

...If you have playing opportunities that you're shying away from because the other musicians just know more songs than you do, and you're worried about them calling things on the spot that you don't know...

...If you feel like you take forever to figure out tunes, that other musicians can figure out in minutes...

...Then this will cost you dearly to miss.

That said, your investment for **"The Fast Ears Bootcamp"** (*that runs for a full eight weeks and includes the mighty "Fast Ears" Ear Conditioning Software Programs*) is only \$595 and I'll even give you a few **"Buy Now Pay Later"** options so you can spread it out over time, if you want to do this, but you're currently strapped for cash.

How do I get a spot?

Super simple...

You don't need to send me any money now.

If you've read the questions above and meet the requirements just reply back... **"I'M IN!" to Support@BassGuitarTips.com**

Then I'll get you set up.

But this is very limited – 7 students only, and it's first come, first served!
